

Disable HotSpot

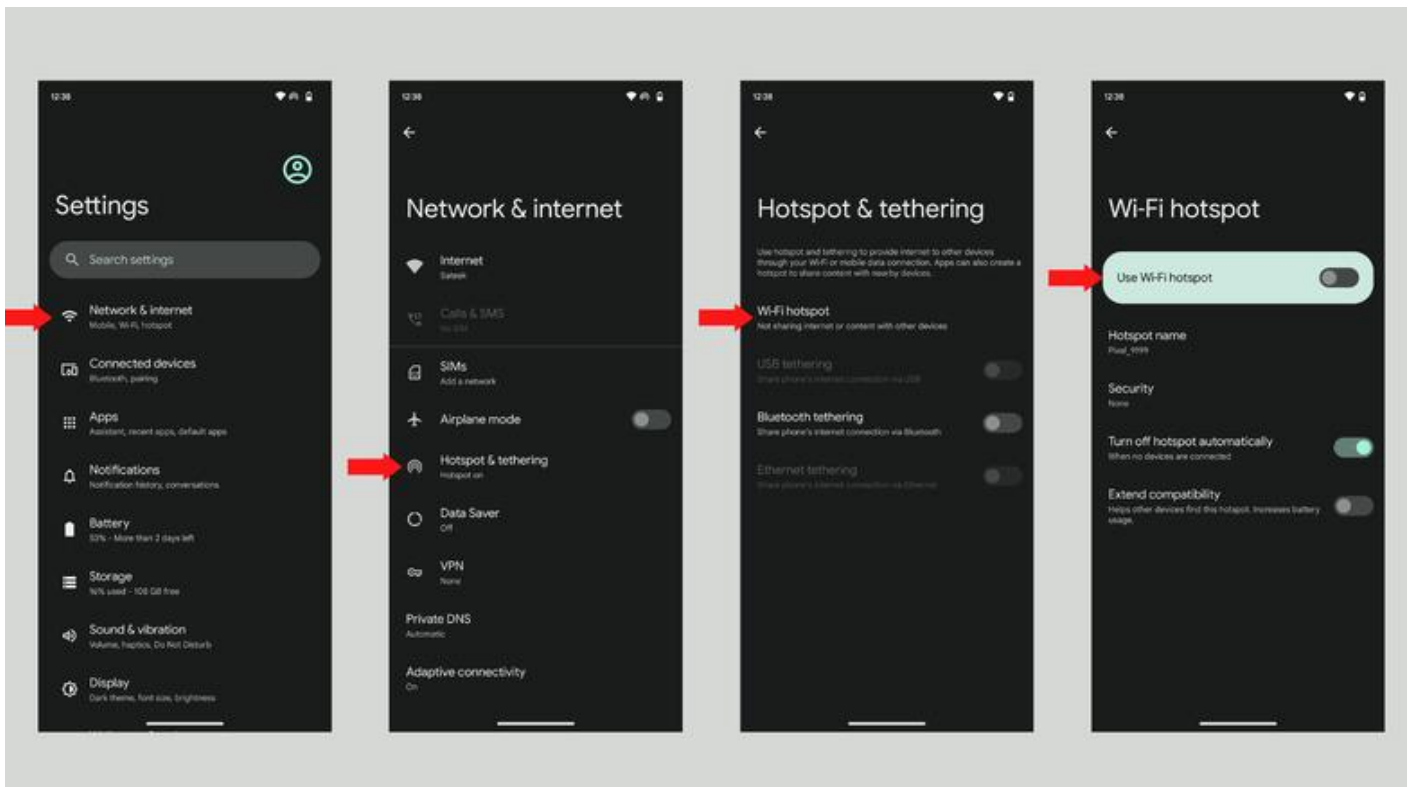

At Piedmont University, we utilize a Wireless Intrusion Prevention System (WIPS) to ensure secure and reliable Wi-Fi connectivity across campus. If you're experiencing connectivity issues, it may be due to personal hotspots or VPNs interfering with our network. Follow these simple steps to disable your hotspot on iOS and Android devices to restore seamless access to campus Wi-Fi.

- [Android Hotspot Settings](#)
- [iPhone Hotspot Settings](#)

Android Hotspot Settings

1. Open **Settings**
2. Tap **Connections** or **Network & Internet** (Varies by device)
3. Select **Mobile Hotspot and Tethering**
4. Toggle **Mobile Hotspot** to **OFF**

iPhone Hotspot Settings

1. Open **Settings**
2. Tap **Personal Hotspot**
3. Toggle **Allow Others to Join** switch to **OFF**
